

Analysis and Report Writing Service

The Dranetz Analysis and Report Writing Service uses our in-house group of Power Quality experts and our industry leading Dran-View software to provide standard, as well as customized reports for only \$795. This easy-to-use Dranetz service has the ability to capture a wide range of power quality data, as well as demand and energy information. Once this information is collected, we provide clear recommendations and guidance for successful mitigation of your PQ problems, and suggestions on ways to better manage your energy costs.

We Won't Leave (until you want us to)

This service does not stop with the first report. On-going services can be provided to review the effects of actions taken and/or to investigate other potential problem areas within your facility.

Detailed Reporting for Only \$795

- The Power Analysis and Report Service is for customers using Dranetz portable/permanent instruments only.
- You do the survey using your Dranetz equipment and then send us the data.
- Dranetz will perform an analysis based on up to 30 days of monitoring data.
- Your report will provide observations, as well as recommendations on what actions should be taken to improve the performance of your operation.

Power Quality Problem Resolutions

- Changes in operations
- Applying mitigation technologies
- Presenting results to your electrical supplier for their resolution
- And much more

Benefit of Demand and Energy Analysis

- Improve Efficiency
- Manage costs
- Peak shaving
- Better staging of operations
- Time of use considerations
- And much more

To find out more on how to get the most value out of your investment in Dranetz equipment, or to purchase Dranetz equipment so you can utilize the Power Analysis and Report Service, contact us at 1.800.372.6832, or email us at sales@dranetz.com.
