

GMC Instruments Americas. One Company, Multiple Brands.

GOSSEN METRAWATT

Gossen Metrawatt is a leading supplier of electrical testing and safety measurement devices including precision multimeters, milliohm meters, insulation testers, electrical safety testers and more. Also included are a range of specialized safety testers for EV high voltage, medical and other applications.

GOSSEN

Gossen Photo specializes in high-quality light meters, serving both the photography and industrial sectors. Products include light meters, exposure meters, and spectrometers for applications ranging from medical imaging, sports arenas, workplace, emergency, billboards & signage lighting, and photography.

SEAWARD

Seaward has been a leader in electrical safety testing since 1982, offering solutions for solar PV testing, medical equipment testing, and high-voltage applications.

RIGEL MEDICAL

Rigel Medical is a trusted provider of biomedical test solutions, including the Rigel SafeTest 60+ electrical safety analyzer, compliant with IEC 60601, IEC 62353, and NFPA-99 standards.

PROSYS

Prosyst expertise is in the design, development and manufacture of current probes, clamp meters, handheld instruments and systems for current and voltage measurement, as well as measurement and processing of electrical parameters.

DRANETZ

Founded in 1962, Dranetz is a pioneer in the power quality and energy monitoring industry, being first to market with a PQ meter. Today, Dranetz offers modern intelligent solutions that meet the strictest industry compliance needs for power quality, electrical demand, and energy consumption monitoring.

CAMILLE BAUER

Camille Bauer specializes in precision measurement technologies for industrial and electrical applications.

CALIBRATIONHOUSE

Calibrationhouse is an ISO 9001 accredited facility that specializes in the calibration of test and measurement instrumentation including electrical, dimensional, temperature, pressure, and flow & humidity to ensure compliance with industry standards.
